

NATURHAUS Natural Resin Primer “High filling”

Product information:	NATURHAUS <i>Natural Resin Primer “High filling”</i> is an alcohol-based, fast-drying, non-yellowing, high filling interior primer, sealer and/or undercoat. It contains natural resins such as shellac and copal and has been developed specifically for wooden furniture and other slightly exposed interior wooden surfaces. It can also be safely used for children’s furniture such as baby cribs, high chairs, tables and toys. The product has exceptional filling capacity. It will reveal and enhance the natural attributes of wooden surfaces and create a breathable, moisture-regulating, dirt-resistant film with superior water-resistant qualities. The product does not enhance the wood-grain and is therefore specifically useful in the treatment of light-coloured hardwood (e.g. beech, birch, maple), when preservation of the original colour is desired.					
Ingredients:	Unbleached shellac, copal, natural rosin ester, micronized wax, mineral filler, ethanol and triple-refined orange oil.					
Application:	<p>Stir well before use. Do not shake the can. Grind surface with 180-grit to 240-grit sandpaper and apply product using airless or airmix spraying techniques. The maximum moisture content for woods should not exceed 12 percent. After a drying time of approximately 2 hours, depending on climate, temperature and humidity, the surface may be treated with an additional coat. One saturation treatment is normally sufficient, but grinding with 240-grit to 320-grit sandpaper to cut upright wood fibres and a second coat is recommended to yield optimal sealing and water-resistant qualities.</p> <p>The coverage of the product may be adjusted by dilution with up to 50 % of NATURHAUS <i>Alcohol Thinner (Prod. No. 92801)</i>. Please note, that the application amount must be increased accordingly to ensure adequate surface quality (dry film thickness not less than 25 µm).</p> <p>Please observe the drying time between successive coatings, even when the surface feels dry shortly. Clean spots and tools with NATURHAUS <i>Alcohol Thinner (Prod. No. 92801)</i>.</p>					
Further treatment:	NATURHAUS <i>Hard Wax (Prod. No. 01050)</i> , NATURHAUS <i>Hard Wax Oil (Prod. No. 01500)</i> .					
Drying time:	approximately 2 hours, depending on temperature and relative humidity.					
Physical properties:	Density: approx. 0.85 g/ml; viscosity approx. 22 seconds (ISO 2431, 4 mm).					
Coverage:	7 - 8 m ² per l (100 - 120 g/m ²), depending on the absorbency of the surface.					
Test specifications:	DIN EN 71-3 (security requirements for toys intended for children).					
Hazard classification:	<i>Highly flammable (F, R11)</i> according to <i>Council Directive 1999/45/EEC</i> .					
Storing conditions:	Keep the original container tightly closed and store in a dry, cool, frost-free and well ventilated area. The product can be stored up to 2 years.					
Security and disposal information:	Keep product away from children. Keep away from sources of ignition and refrain from smoking. Ventilate working area during application and drying. Do not allow to enter drains, surface waters and groundwater. Empty containers completely and send to a licensed recycler. Dispose of used or contaminated product in accordance with local authority requirements. For further information, please ask for our EC material safety data sheet.					
Product No:	92809					
Pack size, Container material:	750 ml tinplate	2.5 l tinplate	10 l tinplate	25 l tinplate	200 l metal drum	900 l container
